EDUCATION

Sri Venkateswara College of Engineering, Kadapa <i>B.Tech in Computer Science (AI & ML)</i>	2022 – 2026 <i>CGPA: 7.5</i>
Sri Chaitanya Junior College, Kadapa <i>Intermediate (11th – 12th)</i>	2020 – 2022 <i>Percentage: 75.2%</i>
Pavan E.M High School, Kadapa <i>Secondary School (10th)</i>	2019 – 2020 <i>Percentage: 98%</i>

SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python , SQL
Frontend: HTML, CSS, Bootstrap, TailwindCSS, React.js, Next.js, Redux
Backend: Node.js, Express.js, Spring Boot, Flask, Hibernate, RESTful APIs, Authentication (JWT, bcrypt)
Database: MongoDB, MySQL
DevOps: Docker, AWS, Linux
Dev Tools: Git, GitHub, VS Code, Hoppscotch
CS Fundamentals: DSA, OOP, OS, CN, DBMS
AI/Automation Tools: Claude, Cursor AI, Lovable

INTERNSHIP EXPERIENCE

Artificial Intelligence Intern, SmartBridge / SmartInternz(Remote)	May 2025 – July 2025
- Developed Clean Tech, a Flask-based AI/ML application focused on applying machine learning to a real-world sustainability use case. - Implemented Python-based data processing and machine learning workflows, including data preprocessing, model development, and evaluation. - Gained hands-on experience in Python, Flask, Machine Learning, data analysis, and AI/ML application development.	
Full Stack Web Developer Intern, SmartBridge / SmartInternz(Remote)	Aug 2025 – Mar 2026
- Developed HouseHunt, a MERN-based property rental platform with JWT authentication and RESTful APIs. - Built responsive React.js interfaces and integrated backend services using Node.js, Express.js, and MongoDB.	

TECHNICAL PROJECTS

DevInspect AI – AI-Powered Code Review Platform	GitHub
- Developed a full-stack MERN application integrated with Google Gemini AI to analyze source code and provide intelligent code reviews, bug detection, optimization suggestions, and best-practice recommendations. - Implemented secure JWT authentication, RESTful APIs, code submission workflows, real-time AI feedback generation, and responsive dashboards using React.js, Node.js, Express.js, and MongoDB.	
TalentIQ – Interview & Video Calling Platform	GitHub
- Developed a MERN-based technical interview platform with secure JWT authentication and role-based access control. - Implemented WebRTC-based one-on-one video interview rooms with screen sharing, recording, live chat, and room locking. - Integrated an online code editor with isolated code execution and automated test-case based evaluation.	

ACHIEVEMENTS & CERTIFICATIONS

- Solved 200+ DSA problems on LeetCode and 100+ problems on GeeksforGeeks.
- Built and deployed full-stack applications including TalentIQ and HouseHunt.
- Certifications: AWS Academy Cloud Foundations, AWS Generative AI, IBM AI & Machine Learning, Red Hat Linux Fundamentals.
